

PTOLEMUS Consulting Group

The Connected Insurance Analytics report

Transforming copper into gold

A complement to the UBI Global Study - October 2016 - PTOLEMUS intellectual property

The consulting & research firm for the connected world

Consulting services

**Strategy
definition**

**Investment
assistance**

**Procurement
strategy**

**Innovation
management**

**Business
development**

Deployment

Research services

Fields of expertise

Car infotainment & navigation

Connected services (traffic information, fuel prices, speed cameras, parking, POIs), maps, navigation

Usage-based charging

Connected insurance, driving behaviour monitoring & analytics, road charging / electronic tolling, car leasing & rental, car sharing, car pooling, Car As A Service, etc.

Telematics & Intelligent Transport Systems

ADAS, autonomous vehicle, connected services, crowd-sourcing, fleet management, eCall, bCall, SVR, tracking, vehicle data analytics (OBD / CAN-bus), VRM, V2X, xFCD

Positioning / Location enablement

M2M & connectivity

Helping clients across the mobility ecosystem

Analytics providers

Automotive manufacturers & suppliers

Mobile telecom operators

Applications providers

Telematics solution providers

ITS operators, regulators & fleets

Insurers, aggregators & assistance providers

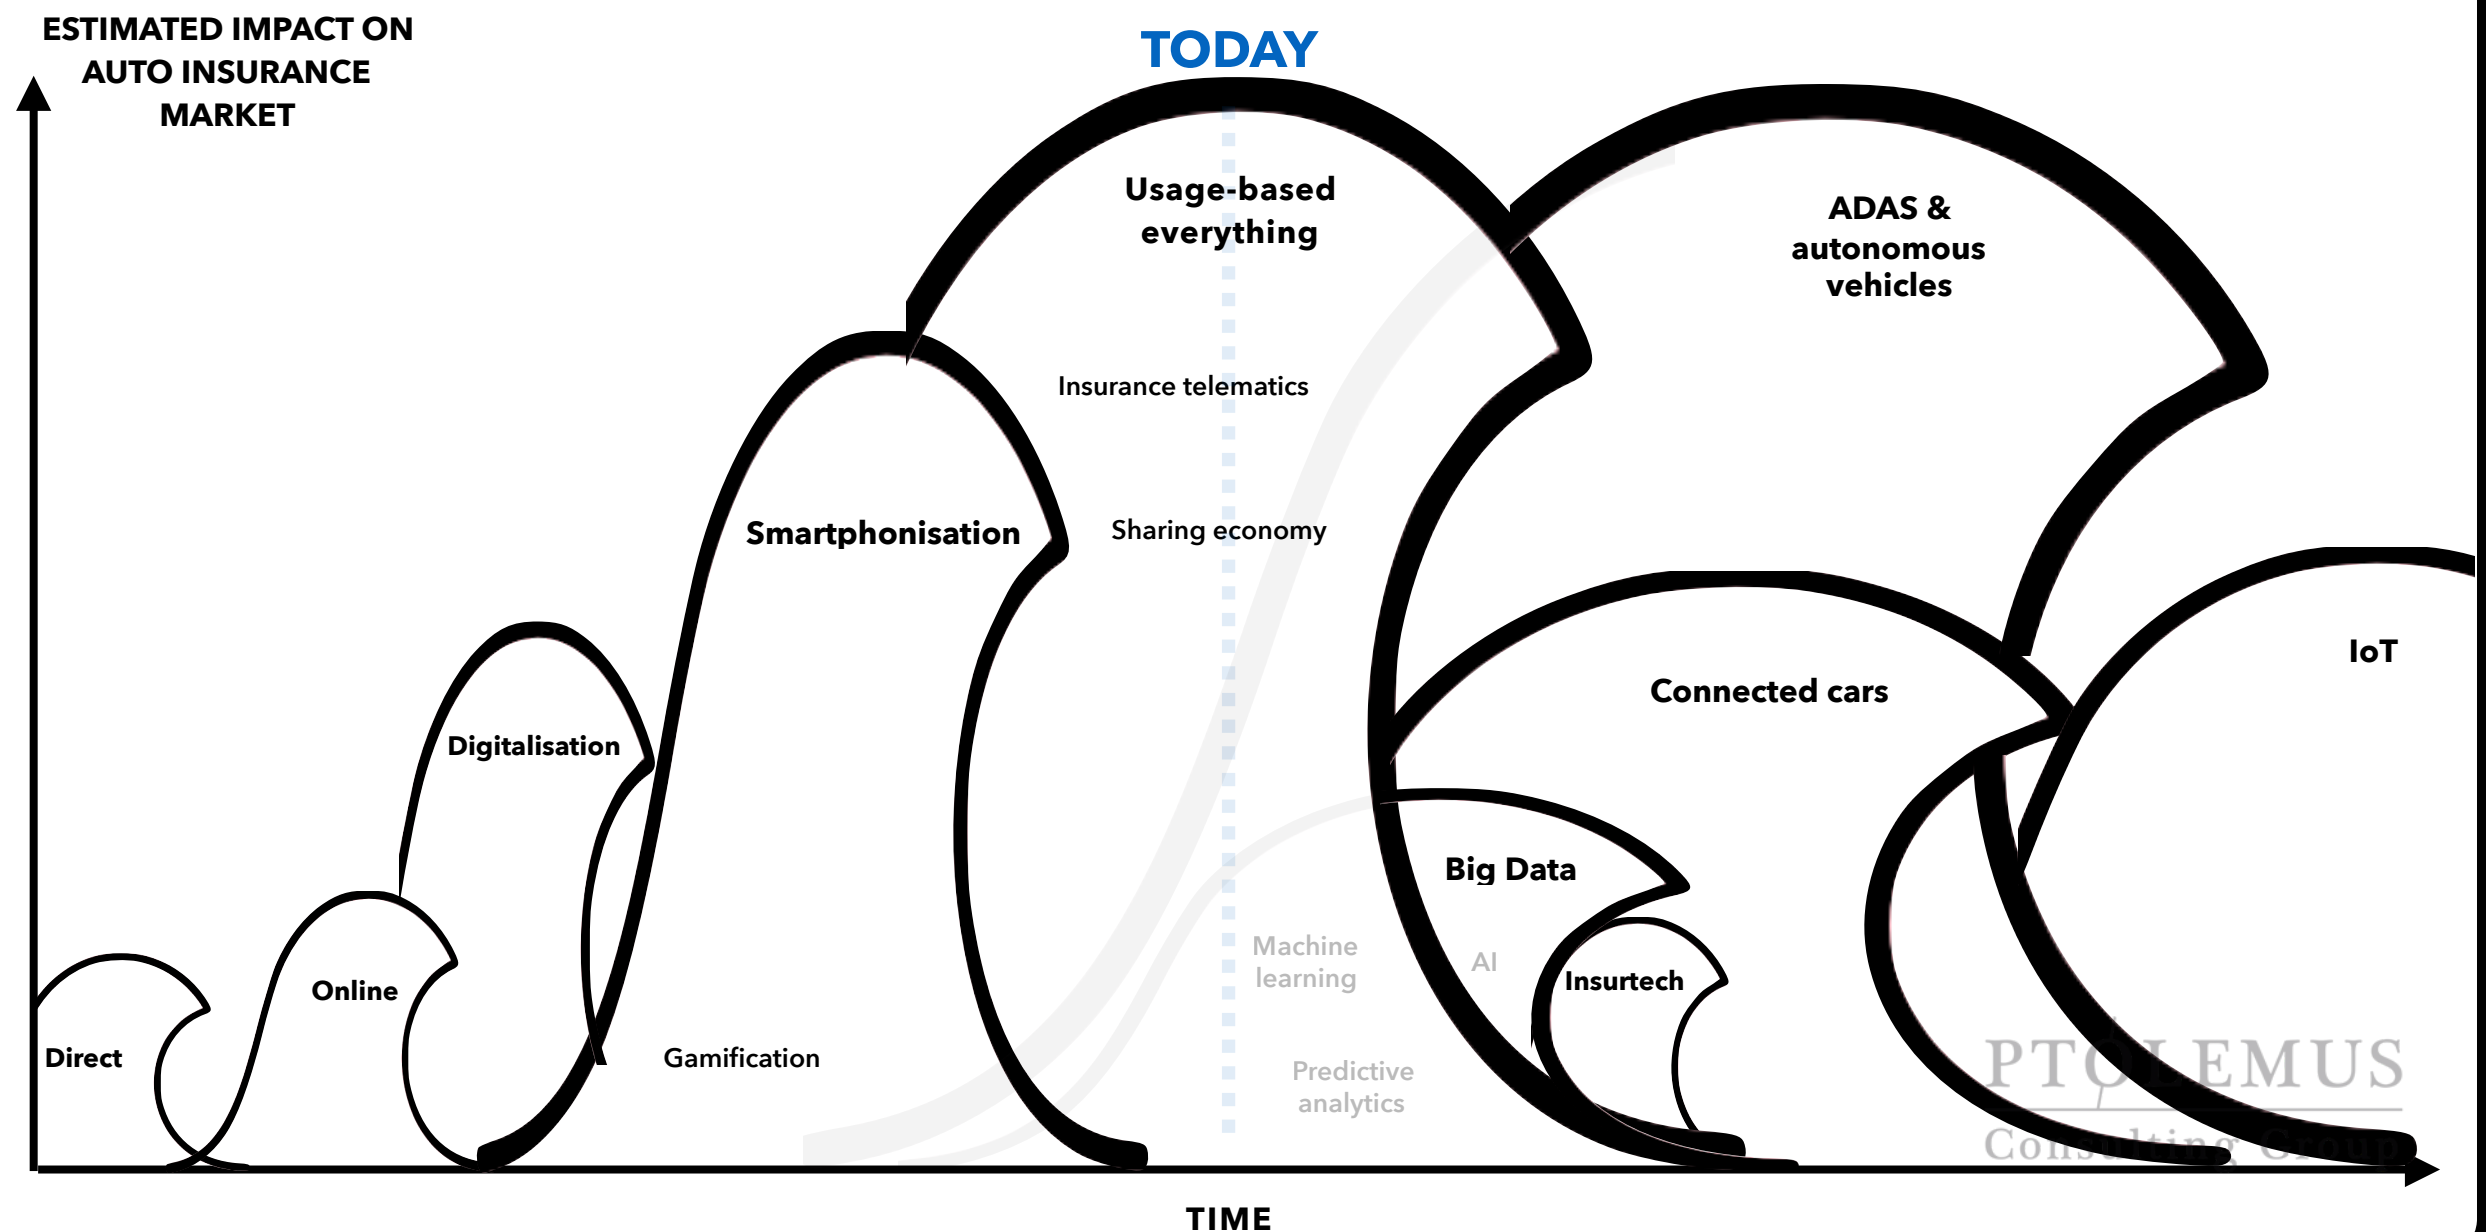

Banks & private equity investors

The insurance sector is facing a maelstrom of changes

The waves - Impact of major trends on auto insurance business

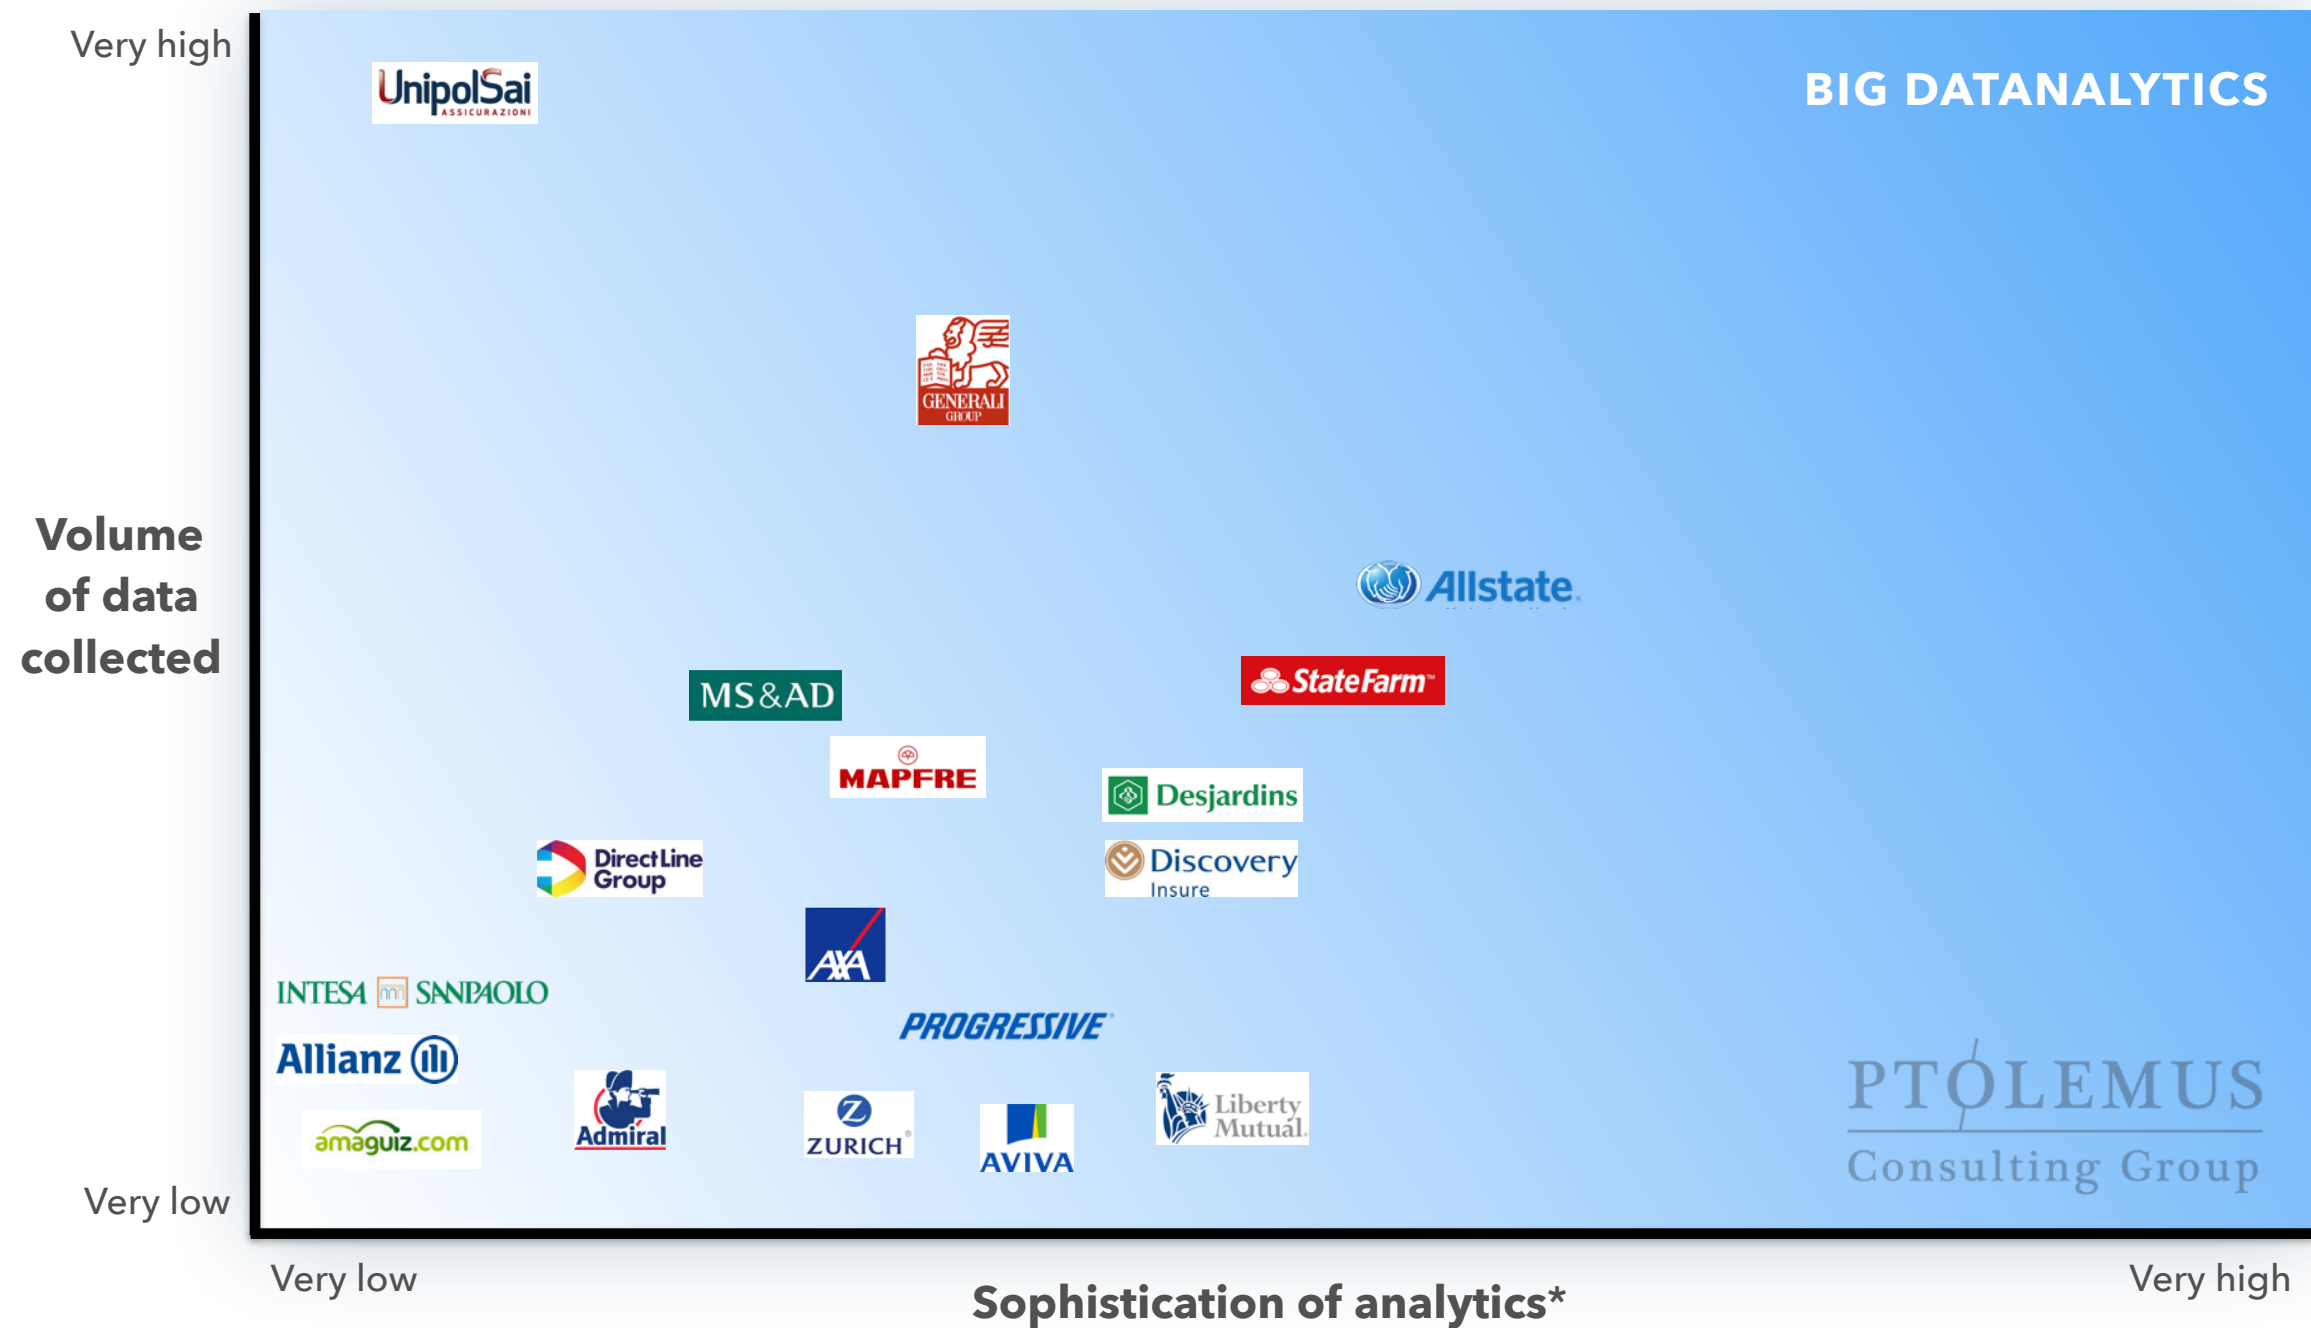

The wave of connected insurance is rolling in globally...

The number of active UBI programmes worldwide is now reaching 250

... but the race towards Big Datanalytics just started!

The authors of this report combine 40 years of experience in insurance telematics and analytics

Frederic Bruneteau, Managing Director, Brussels

fbruneteau@ptolemus.com

Frederic Bruneteau has accumulated 20 years of **experience** including 17 years of experience of the mobility domain and 10 years of strategic and financial advisory for companies such as Arthur D. Little, BNP Paribas, SFR Vodafone and TomTom.

Within PTOLEMUS, he has led **more than 40 assignments related to insurance telematics & analytics** for global leaders such as Admiral, Aioi Nissay Dowa, AXA, Baloise, Danlaw, DriveFactor, Europ Assistance, Generali, LexisNexis, Liberty Mutual, Macif, Matmut, Michelin, Octo Telematics, Qualcomm and Toyota.

He has become **one of the world's foremost experts in Usage-based Insurance (UBI)** and is interviewed on the subject by publications such as the *Financial Times* and *The Economist*. He has spoken at more than 20 related conferences worldwide.

Frederic co-authored this report and the UBI Global Study 2016.

Thomas Hallauer, Research Director, London

thallauer@ptolemus.com

Thomas Hallauer has gained 15 years of **strategy, research and marketing experience** in the domain of telematics and location-based services from companies such as **Admiral, DriveFactor, Liberty Mutual, Michelin, Mobile Devices, Octo Telematics** and **Wunelli**.

Thomas is the lead author of the ETC Global Study, he is also the co-author of the UBI Global Study 2016.

Thomas fully reviewed this report.

Sahand Malek, Consultant, Brussels

smalek@ptolemus.com

With a PhD in Mechanical Engineering from the University of Bath, UK, Sahand Malek has gained almost 5 years of **experience in telematics research and development projects on vehicle On-Board Diagnostics (OBD), data management and analytics**, Usage-Based Insurance (UBI) and Advanced Driving Assistance Systems (ADAS).

He notably conducted an extensive academic study on the effect of driving behaviour on fuel consumption and road safety.

Sahand is **the lead author of the Connected Insurance Analytics Report**.

With advanced analytics, insurers will be able to

1

Accurately evaluate the driver's risk in near-real-time

2

Make sense of their customer's behaviour and risk profile along the customer lifecycle

3

Generate new contact points with the customer thanks to more driver-specific data at different stages of the contract

4

Bring together and link all core activities from marketing to claims management

5

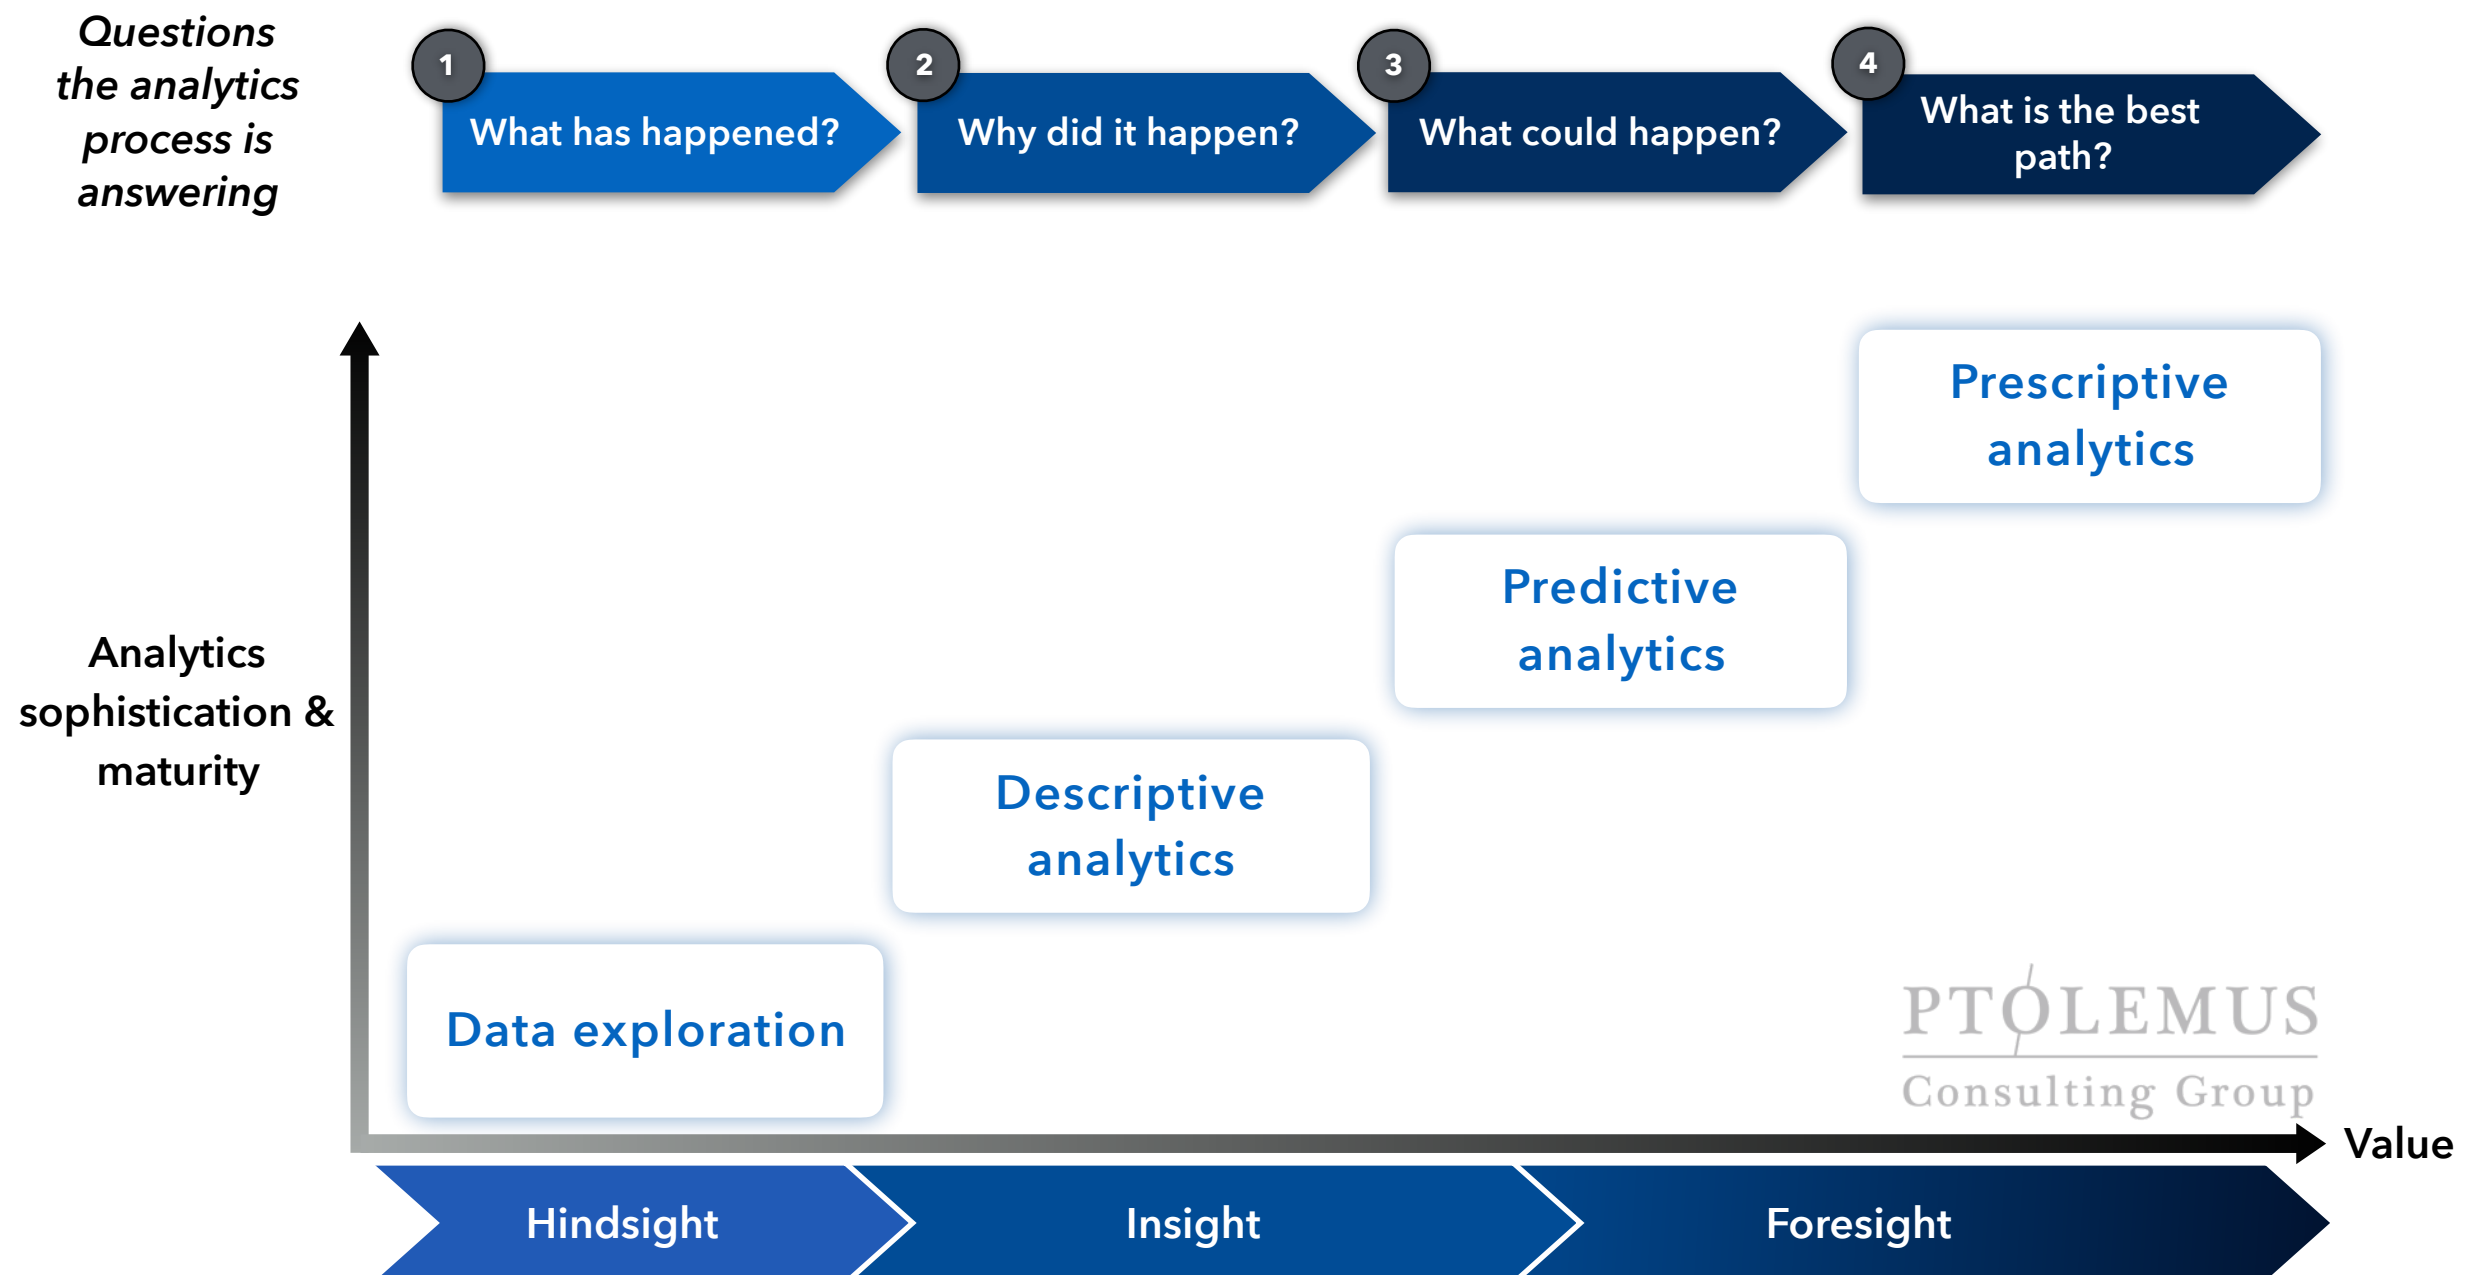

Identify new business opportunities by using & looking at data in a new fashion, i.e. create new segment-specific offers

6

Reduce risk by making driver feedback a lot more effective on risk management

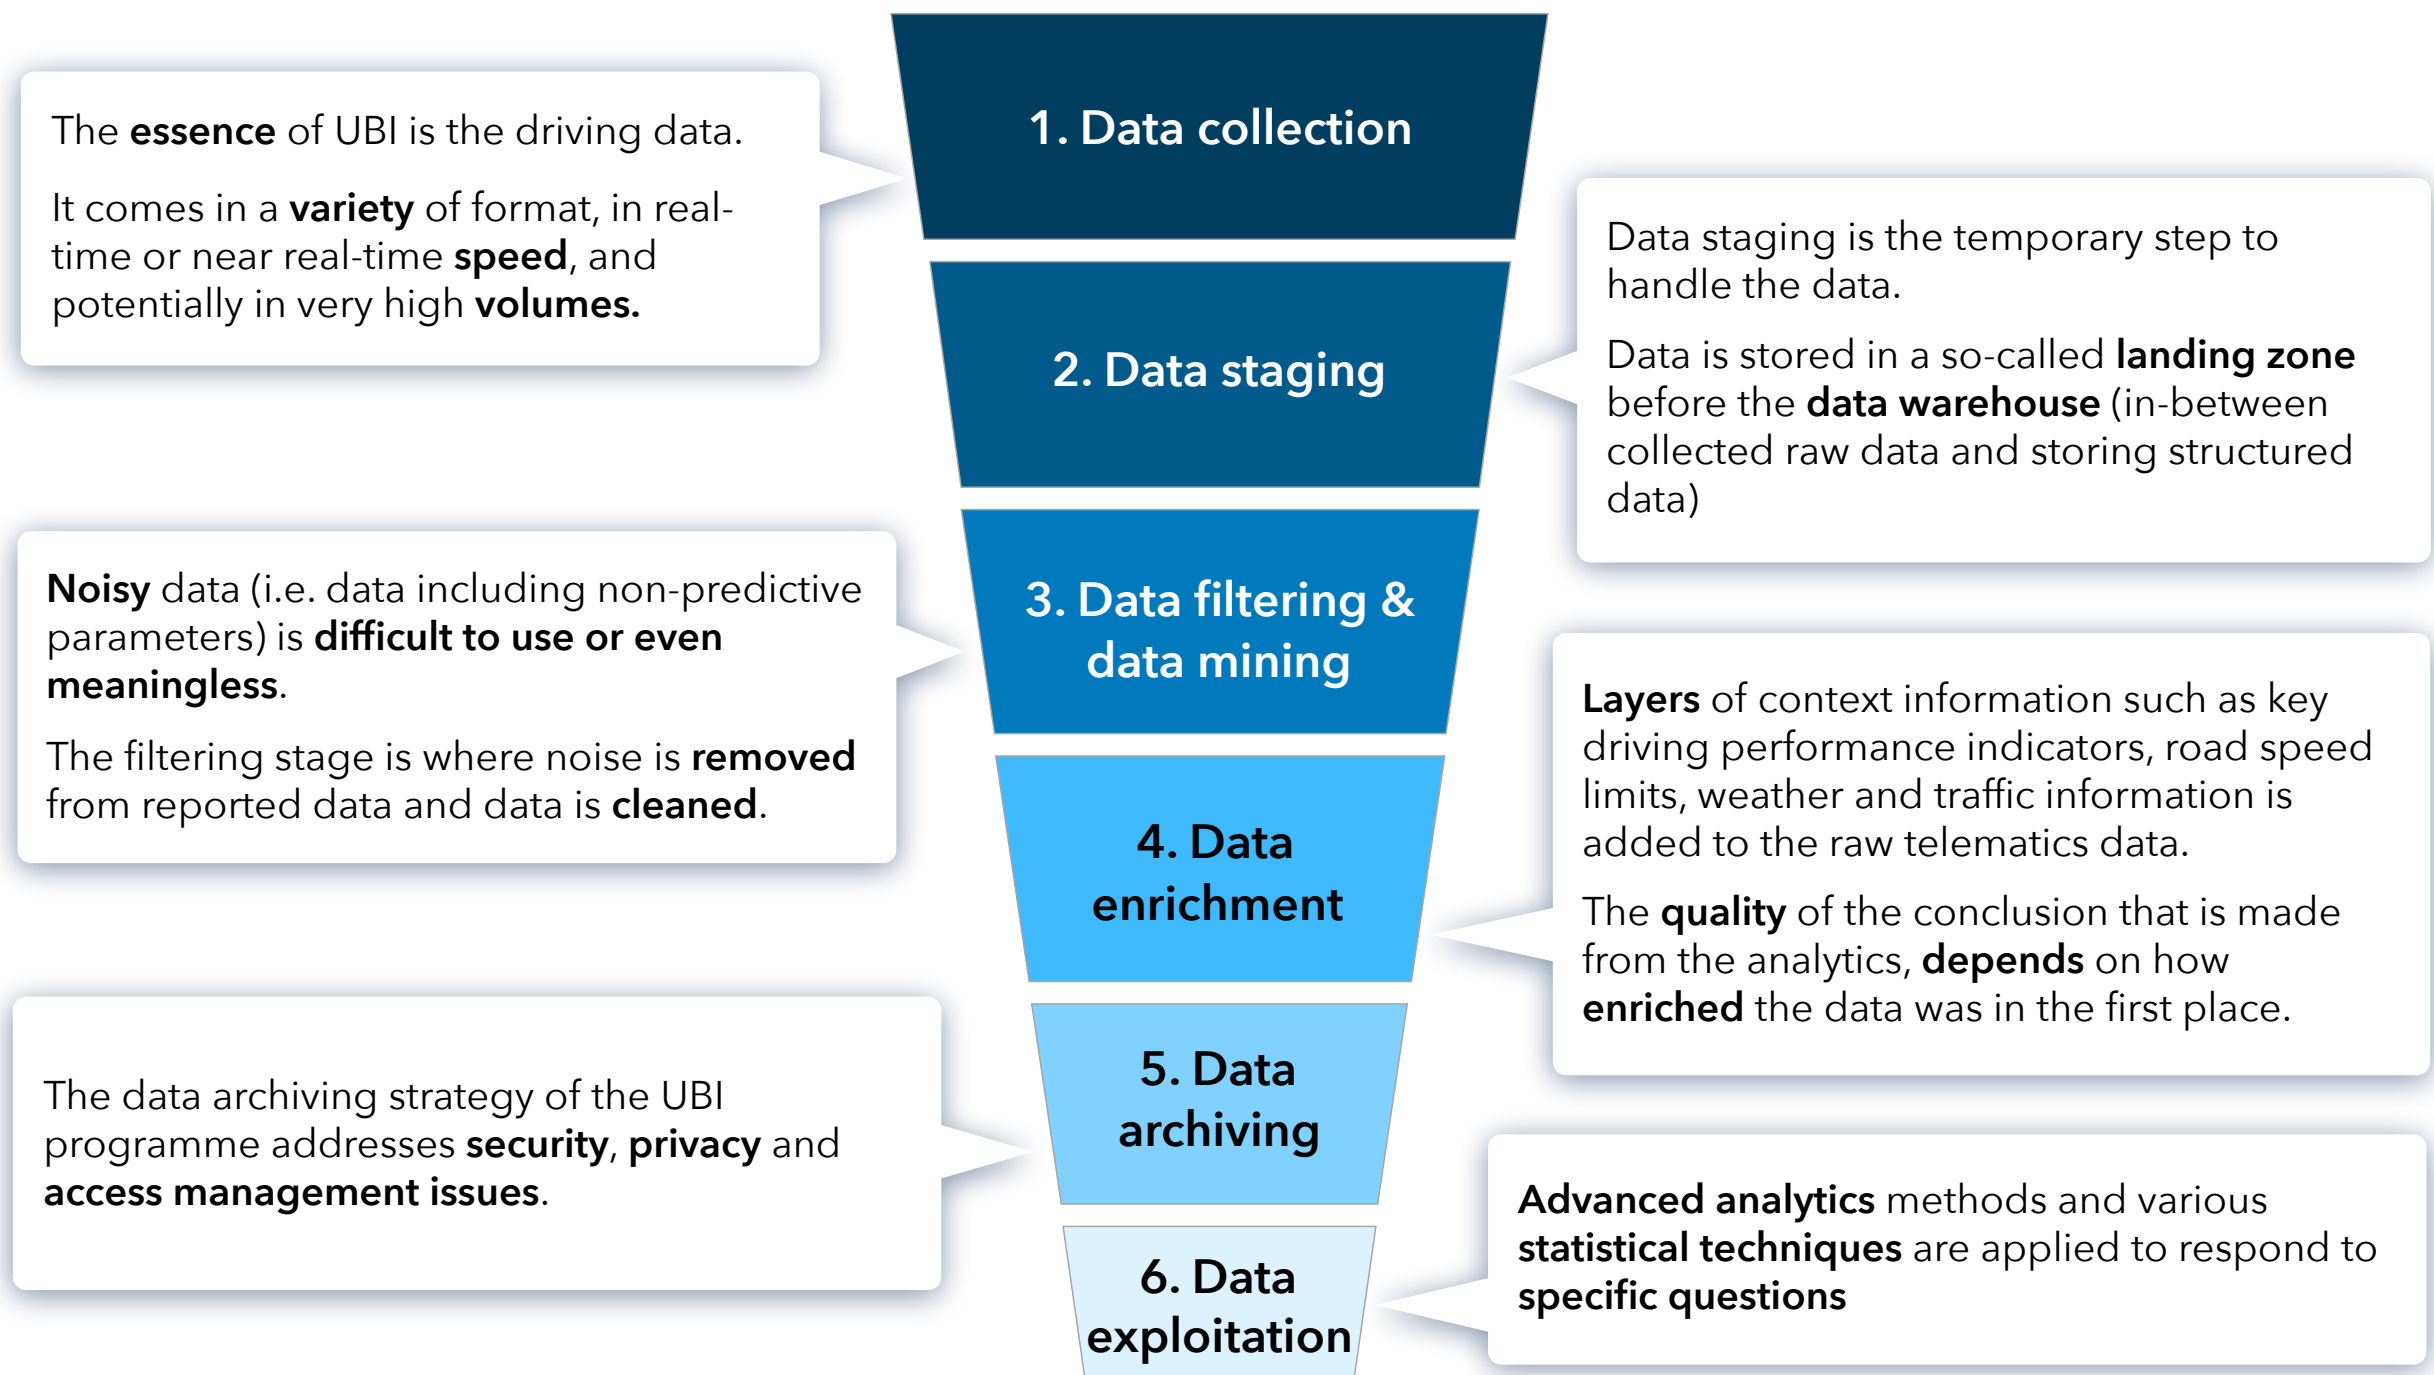

But the journey to advanced analytics is long and arduous

Drilling into Big Data is done in 6 essential steps

To find your way, follow our best practices on driver scoring

1

Scoring should be trip-based with adjustments made monthly and quarterly using weighting methods.

2

Put driving behaviour in context by relating it to environmental information.

The set of information layers should at least include: relative speed limit, road type and crash-prone locations.

3

Sub-scores, such as smoothness, mileage, time of day and driving duration should be provided to insurers as standard.

4

Correlate behaviour with past claims records, crashes and actual claims losses to continue improving predictiveness.

5

Driver distraction tracking should be done at a granular level and it is recommended that a smartphone app is used to that effect.

6

Scoring criteria and sub-scores must be clearly expressed and made understandable to drivers. Criteria the driver cannot influence should be explained separately.

This report has one objective: helping insurers transform Big Data **copper** into Analytics **gold**

The most comprehensive research on the UBI analytics market

- Analysis of the pricing and data management policies of the 27 largest UBI programmes including :
 - Admiral, Allianz, Allstate, American Family, AXA, Generali, Desjardins, Direct Line Group, State Farm, The Hartford, UnipolSai, Uniqa and Zurich
- Based on 40 in-depth interviews with Telematics Service Providers (TSPs), analytics providers and insurers
- 5 interviews transcribed: Nationwide, Insurethebox, LexisNexis Wunelli, Octo Telematics and The Floow
- Illustrated by case studies from companies using advance analytics such as: Progressive, Generali, Insure the box and many more
- Profile and review of 10 advanced analytics suppliers active in UBI
 - Accenture, Cambridge Mobile Telematics, Cognizant, HERE, IBM, IMS, SAS, Verisk Analytics and Willis Towers Watson
- Findings and recommendations validated by 150 academic papers and journals
- All that in a 340+ page document with over 150 graphs and tables
- Resulting in 20 best practices including recommendations on how to record and process driving data, score drivers and interact with them.

Download the 90-page abstract today at www.ptolemus.com/cia-abstract

Based on interviews of more than 200 new companies in 30 countries including 12 analytics providers

Table of Contents	
THE FUNDAMENTALS OF THE UBI MARKET	61
Why are many insurance markets not profitable	61
A maturing business in the most advanced markets	61
Increasing churn	63
Changing claims costs	63
Repair costs	67
Personal injury claims	70
Fraud	73
The advent of online distribution	75
The impact of new technologies on the insurance sector	74
Big data analytics	74
Broadband connectivity to cars	74
Connected navigation / info	74
Smartphonisation	74
Active & passive safety & V2	74
Autonomous vehicles	74
Can telematics solve the motor	74
A European perspective on	74
The North American market	74
So who is UBI for?	74
The young market	74
The middle market	74
The senior driver segment	74
Some of the challenges ahead	74
MAKING ADVANCED ANALYTICS WORK	74
How advanced analytics will change	74
Telematics data is the difference	74
There are 5 stages during the UBI	74
The 4 pillars of UBI analytics	74
Making sense of driving data	74
How does an analytics machine	74
A large amount of highly diverse	74
The funnel-shaped process of	74
The aim of the analytics machine	74
There are six steps to process	74
UBI requires a clear data collection	74
How much telematics data do you	74
So is it telematics data or telematics	74
How fast does telematics data re	74
You need to set a stage to leverage	74
3 advantages of big Data system	74
Data filtering and Data Mining	74
1) Keeping useful information by	74
2) Kalman filter in action: removing	74
3) By structuring the driving data	74
Put telematics at the centre of your claims process	289
Factors affecting the motor line loss ratio	289
General trends	289
Trends in accidents and casualties	289
The evolution of fraud in motor insurance	289
The end of Personal Injury (PI) referral fees?	289
Acceptance and geographies	289
So who are the segments for accident management?	289
The "new car" evolution	289
The effect of telematics on claims today	289
The 3 ground rules	289
Before the accident: predictive modelling	289
After: reconstruction and claims services	289
FNOL detection and reporting	289
Accident management and services	289
How telematics reduces the cost of claims management	289
Fast and automatic First Notification Of Loss (FNOL) saves lives	289
It also saves money	289
Avoid litigation	289
Benefits from accident reconstruction	289
Conclusions and recommendations	325
UBI's future depends on smart data and sophisticated analytics	325
The UBI market is maturing rapidly	325
Be prepared to handle increasing data volumes	326
Be prepared to deal with Big Data challenges	327
Be prepared to provide transparent driving scores	329
Be prepared to overhaul your data strategy - and culture	331
Be prepared to gear up to advanced analytics	332
Four decisions to make before upgrading to advanced analytics	336
Choosing the right telematics data collection solution	336
Choosing the right data system	336
Choosing the right team	336
Choosing the right strategic partner	337
Questions about telematics analytics answered	339
If the user owns the data, why isn't it portable?	339
Will data become a barrier to entry?	339
What can advanced analytics do that basic analytics cannot?	340
OLEMUS Connected Insurance Analytics Report 2016	57
Fig. III: Telematics analytics companies position based their analytics experience and smart data	58
Fig. 1.2: The European motor insurance market has entered a stagnation phase	62
Fig. 1.3: Gross premiums in key European countries (€ million)	63
Fig. 1.4: Share of people switching their provider in last 2 years (unless otherwise indicated)	64
Fig. 1.5: Rising motor claims (in million) in Europe (€ in millions)	65
Fig. 1.6: Number of road accidents and injured in Europe (in thousands)	66
Fig. 1.7: Annual price variation of automotive spare parts & accessories (%)	67
Fig. 1.8: The growing cost of claims	69
Fig. 1.9: The application helps its customers find assistance	70
Fig. 1.10: The share of claims with personal injury is very high (in % of total claims)	72
Fig. 1.11: Claims managed has decreased steadily (% variation)	73
Fig. 1.12: Fraud is a significant reason for claims	75
Fig. 1.13: From high rates of fraud (Rate per 1,000 claims)	76
Fig. 1.14: Online channel in the US	77
Fig. 1.15: New vehicles sold with embedded telematics (million)	79
Fig. 1.16: UBI trials* and launches in 2013 and 2015 xxx	85
Fig. 1.17: Insurance telematics trials and launches in the US	86
Fig. 1.18: Insurance telematics trials and launches in the US	88
Fig. 1.19: Insurance telematics trials and launches in the US	89
Fig. 1.20: Web-based tool: Road Aware from State Farm	92
Fig. 1.21: Allianz France's take on Progressive suckers widens UBI appeal	94
Fig. 1.22: Average claims frequency and severity of Italian drivers, by age	95
Fig. 2.1: Traditional insurance value chain: minimal interaction with customers	99

It provides a step-by-step advanced analytics roadmap...

... and uses results of real world driving tests

Parameter	Unit	Formulas to consider	Method of data acquisition		
			Mobile	OBD	Other devices
Latitude and Longitude	d° m' s"	Decimal degrees (dd) or $\Phi = d + m/60 + s/3600$	GPS sensor	GPS sensor	GPS sensor
Elevation (Altitude)	m	—	Mapping	Mapping	Mapping
Speed	km/h	—	GPS sensor	ECU reading	GPS sensor
Acceleration	m/s ²	$a_t = \Delta V / \Delta t = (V_2 - V_1) / (t_2 - t_1)$	Accelerometer and GPS sensors	Accelerometer, Calculated from speed	Accelerometer and GPS sensors
Braking	m/s ²	—	GPS sensor	GPS sensor	GPS sensor
Cornering	g's	$(V_2^2 - V_1^2) / 2 \Delta X \cdot g$	GPS sensor	GPS sensor	GPS sensor
Mileage	km	$\Delta \alpha = 2 \arcsin \left(\sin \left(\frac{\Delta \phi}{2} \right) \cos \phi_1 \cdot \cos \phi_2 + \sin \left(\frac{\Delta \phi}{2} \right) \right)$ or use this: Distance travelled = $\int v(t) dt$	GPS sensor	GPS sensor	GPS sensor
Motorway miles	km	—	GPS sensor	Odometer	GPS sensor
Time of the trip	hh:mm:ss	—	Sync time	Sync time	Sync time
Duration of the trip	hh:mm:ss	Duration of a trip into sec: hh:mm:ss * 86400	Sync time	Sync time	Sync time
Other OBD / CAN data	Depends on parameter	—	—	—	—
Phone use / Driving	Yes / no	If the UBI came with dedicated mobile app the solution was easy. Otherwise, it is possible to use vehicle speakers to detect phone usage.	—	—	—

Parameter	The evaluation metrics: threshold rules and criteria
1 Speeding	Between 1.15 to 1.5 times above the speed limit
2 Harsh acceleration	Based on g force value, various thresholds, usually it is from 0.4 to 0.6 g
3 Harsh braking	Based on g force value, various thresholds, usually it is from 0.2 to 0.4 g
4 Cornering	Based on speed and cornering force, value exceeding 0.2 g
5 Unsafe lane changing	Based on speed, location and g force, value exceeding 0.2 g

Reports	Connected Insurance Analytics Report Only	UBI Global Study 2016 with market forecasts + Connected Insurance Analytics update
Contents	<ul style="list-style-type: none"> • 340-page study (pdf format, password-protected) • 10 company profiles • 20 best practices • Recommendations to insurers and analytics providers 	<ul style="list-style-type: none"> • 1,200-page study (pdf format, password-protected) • Market forecasts outputs with graphs (Excel format, password-protected) • 60 TSP, TTP & analytics supplier profiles • 30 country profiles
Company-wide licence	<p>€ 3,995</p> <p>Approx. \$4,350</p>	<p>€ 8,990</p> <p>Approx. \$9,799</p>

For more information and to order the update if you already have the UBI Global Study 2016, contact us at thomas@ptolemus.com

We also issue a quarterly dashboard of the UBI market

*All the hard data you need to define
& adjust your strategy*

- 60-page barometer of the global UBI industry

- Covers 170 companies
- Covers the US, Canada, France, Germany, Italy, Spain and the UK
- Issued on a quarterly basis
- 190 charts, tables & figures

- Leverages both public information and primary research

- A large set of public information collected from conferences, desk research, etc.
- Supplemented and validated by primary research & data (Interviews, supplier questionnaires, own market forecasts, etc.)

- Brings you the most important market news

- Estimates UBI volumes and sales for all main players

- Insurance companies
- TSPs
- Technology providers

- Deciphers the key market trends

- UBI penetration
- Number of programmes
- Mix by business model (PAYD, PHYD, TBYB, etc.)
- Market share of all main insurers, TSPs and device makers
- Technology mix (Black boxes, OBD, apps, etc.)
- Business line mix
- Segment mix (Young drivers, mature drivers, etc.)
- Channel mix aftermarket / OEM

PTOLEMUS brings unparalleled depth of knowledge in UBI

The most comprehensive research on the UBI analytics market

The reference report on the subject, quoted by The Economist, the Financial Times and the Wall Street Journal

30 insurance markets and 60 suppliers analysed

Referenced figures and forecasts for 14 connected car services

Quarterly insight into your standing in the UBI market
